Subject: Crab and Clam Field and Data Reports

Eugenia,

Please find below links to download the field and data reports for implementation of the Crab and Clam QAPP. The field report includes both the crab/clam and fishing activities since they were partially conducted together. The appendices for the field report are a separate file due to their large size. A separate data report will be submitted for the Fish QAPP. The Crab and Clam Data Report has two appendices, laboratory data reports and data validation reports, that will be submitted with the final report. The laboratory data reports will be submitted on a CD due to their large size. Please let me know if you have any questions.
